

COVID-19 UPDATE 384: MONDAY 15 NOVEMBER 2021

Interstate exposure locations

A number of COVID-19 exposure locations have been identified in Queensland and Tasmania. If anyone has visited any of the locations at the date and time listed, they should quarantine and complete the online form to notify SA Health.

For more information or to complete the form visit

www.sahealth.sa.gov.au/COVIDinterstate.

Testing, Tracing, Isolation and Quarantining model

The Testing, Tracing, Isolation and Quarantining (TTIQ) model was released today which outlines the testing and quarantine requirements for contacts of a COVID-19 case from 23 November. This is a general guide and SA Health will advise people of their requirements following a risk-based assessment.

With this new TTIQ model, fewer people will be required to quarantine. It will also enable more people to quarantine for shorter periods of time. Vaccinated people will only be required to quarantine for seven days compared to unvaccinated people who will be required to quarantine for 14 days.

For more information, including definitions of contacts, visit the [SA Health website](http://www.sahealth.sa.gov.au).

Testing and quarantine requirements for contacts of a COVID-19 case

GENERAL PUBLIC

	LOW RISK CASUAL CONTACT	CASUAL CONTACT	VACCINATED CLOSE CONTACT	UNVACCINATED CLOSE CONTACT
Quarantine requirements	None	Until first negative test	Quarantine for 7 days from exposure	Quarantine for 14 days from exposure
Testing requirements	None	<ul style="list-style-type: none"> Minimum 3 tests Get tested immediately Get tested again on day 6 and 13 Get tested immediately at any time if symptoms develop 	<ul style="list-style-type: none"> Minimum 3 tests Get tested immediately Get tested again on day 6 and 13 Get tested immediately at any time if symptoms develop (negative day 6 test required to be released from quarantine) 	<ul style="list-style-type: none"> Minimum 3 tests Get tested immediately Get tested again on day 6 and 13 Get tested immediately at any time if symptoms develop (negative day 13 test required to be released from quarantine)
Any contact who develops symptoms must get a throat-nose swab (PCR) and isolate until result is known and symptoms have resolved.
